# How to Connect My Bike

---

You can pair your Velotric bike with the Find My app on your iOS® device in a few simple steps:

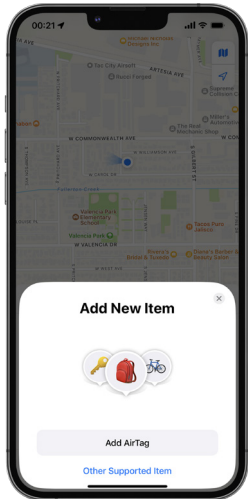

1. Make sure your bike is powered on.
2. Open the Find My app on your iOS device. On the **Items** tab, tap **Add Item**.

## How to Disable Find My Tracking Temporarily

---

After you paired with your bike, you can disable Find My tracking temporarily without removing your bike from Find My app.

1. Make sure your bike is powered on.
2. Press the power button for 10 seconds. You will hear a sound that signals the tracking is disabled. The location of your bike will not update and the 'Play sound' function will no longer be usable in Find My app.

## How to Disable Find My Tracking Temporarily

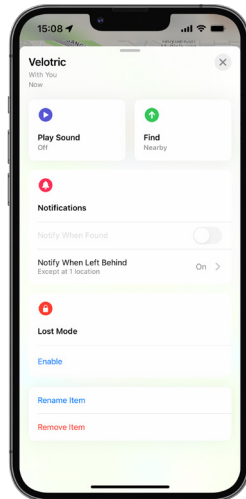

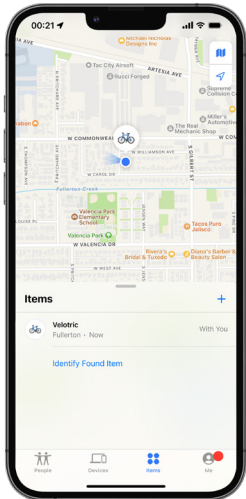

---

3. To enable Find My tracking again, make sure your bike is powered on, press the power button for 10 seconds, and you will hear a different sound that signals Find My tracking is enabled.

## How to Enable Lost Mode

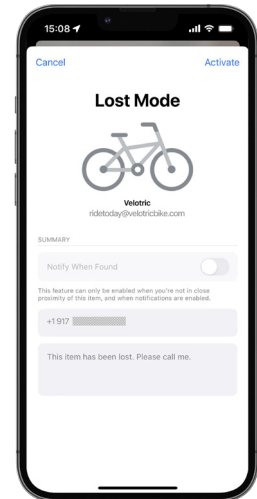

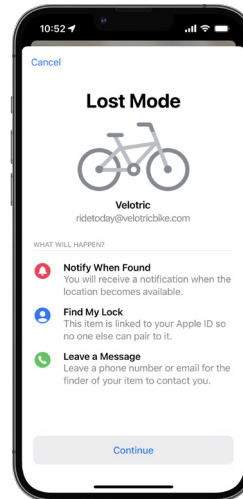

If you find your bike missing, enable Lost Mode to locate your bike by following these steps:

1. Select your bike from the Items list.
2. Tap **Enable** under Lost Mode.

## How to Enable Lost Mode

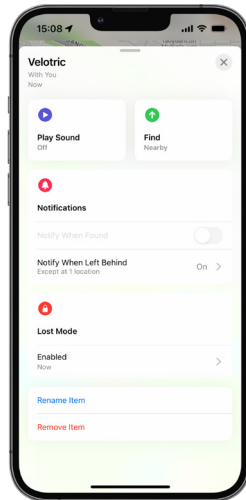

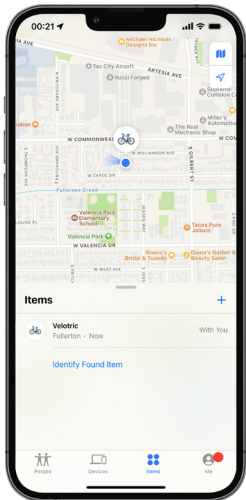

3. Read **WHAT WILL HAPPEN?** and tap **Continue**.
  4. Enter your phone number or email address, and tap **Activate** to turn on Lost Mode.
- NOTE** If your bike is locatable, other iOS users can help identify your bike by tapping **Identify Found Item** on their Find My app.

## How to Disable Lost Mode

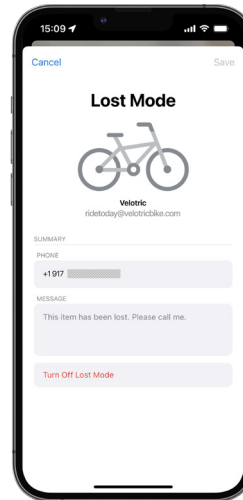

You can disable Lost Mode when your bike is found in a few simple steps:

1. Select your bike from the Items list.
2. Tap **Enabled** under Lost Mode.

## How to Disable Lost Mode

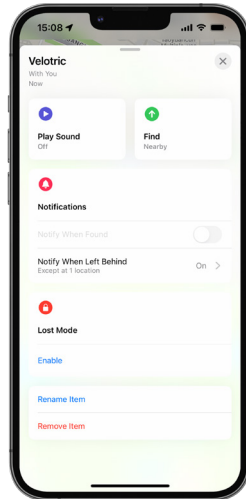

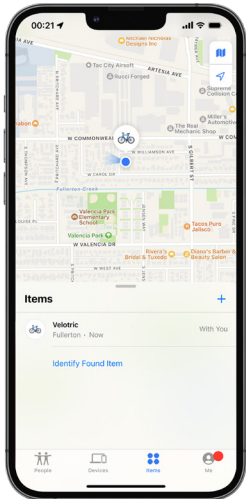

3. Tap **Turn Off Lost Mode**. You have now disabled Lost Mode.

## How to Remove My Bike

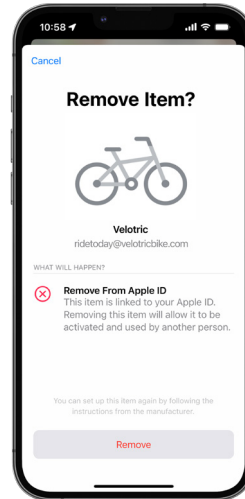

If you no longer own the bike, remove it from your Find My network by following these steps:

1. Select your bike from the Items list.
2. Scroll to the bottom and tap **Remove Item**.

## How to Remove My Bike

3. On the Remove Item screen, tap **Remove**. Your bike will be removed from your Items.

## How to Restore Factory Settings

---

Restoring factory settings allows you to unpair your bike if your bike is offline when you remove your bike from Find My app.

1. Make sure your bike is powered on.
2. Press the light button and "-" button on your remote at the same time for 10 seconds, you will hear a sound that signals your bike has been restored to factory setting successfully.

The Apple® Find My network provides an easy, secure way to locate compatible personal items using the Find My app on your iPhone®, iPad®, Mac®, iPod touch®, or the Find Items app on Apple Watch®.

To use the Apple Find My app to locate this item, the latest version of iOS, iPadOS®, or macOS® is recommended. The Find Items app on Apple Watch requires the latest version of watchOS®.

Use of the Works with Apple badge means that a product has been designed to work specifically with the technology identified in the badge and has been certified by the product manufacturer to meet Apple Find My network product specifications and requirements. Apple is not responsible for the operation of this device or use of this product or its compliance with safety and regulatory standards.
